New Manila International Airport (NMIA)
Updates as of October 2025

Building Opportunities, Strengthening Partnership with Communities

Livelihood Restoration

The Community Fleet Service – Boat Program has been launched to provide employment opportunities for Project Affected Persons (PAPs) with local wooden boats. These PAPs will offer transportation services to support the NMIA project. After completing the required orientation and pre-employment steps, eight (8) PAPs have been officially hired for the program.

Thirteen (13) Project Affected Persons (PAPs) were hired as monitoring community workers, mangrove field assistants, and offset workers at the Biodiversity Offset Program sites in Hagonoy and Malolos, Bulacan, and Macabebe in Pampanga.

- Two (2) PAPs have been hired as kitchen helpers at the SMAI Livelihood Center in Bulakan, and San Miguel Corporation's Head Office in Mandaluyong. This brings the total number of PAPs currently employed at Sentro88 Foods Inc. to nine (9).

- Eight (8) PAPs completed the 2,370-kg colored round rag order for San Miguel Yamamura Packaging Corporation (SMYPC) Laguna Plant, while production for the San Fernando Plant order is ongoing.

Kumusta? Community Engagements

SMAI engaged with sixteen (16) barangays to discuss their concerns (if any) and distribute information bulletins containing important updates about the Airport development.

Municipalities	Barangays
Bulakan	San Jose, Sta. Ana, Bagumbayan, Perez, Sta. Ines, San Nicolas, Taliptip, Balubad, Bambang, Matungao, Tibig, Pitpitan, Maysantol, San Francisco
Obando	Tawiran
Meycauayan	Ubihan

The Community Advisory Council (CAC) meeting was held on October 15. The CAC serves as a forum for dialogue and collaboration between SMAI and the Municipality of Bulakan, ensuring that community perspectives, concerns, and recommendations are duly considered in the ongoing development of the Airport Project. During this session, discussions focused on the progress of the Airport Toll Road development and the implementation of the Project-Induced In-Migration (PIIM) study.

Environment & Sustainability Development

Environmental Monitoring

As part of SMAI's commitment to environmental stewardship, the following monitoring activities are regularly conducted in the following areas:

- Water quality monitoring (Manila Bay and Brgy. Ubihan)
- Groundwater sampling (Brgys. Taliptip & Bambang in Bulakan; and Brgys. Binuangan and Salambao in Obando)
- Noise monitoring (Bulakan and Malolos)

Airport Toll Road

As part of the Project, an Airport Toll Road (ATR) will be built to connect NMIA to the North Luzon Expressway (NLEX), providing seamless travel to and from the airport. The ATR component is part of Republic Act 11506, which grants SMAI the franchise for NMIA through a public-private partnership with the national government.

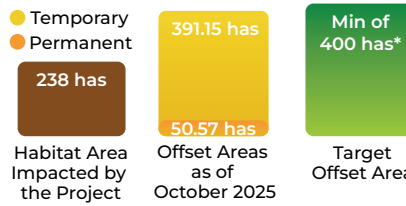
To prepare for implementation and ensure impacts are identified and mitigated, SMAI is developing the following:

- Environment and Social Impact Assessment (ESIA);
- Project-Induced In-Migration study (PIIM);
- Traffic Impact Assessment (TIA);
- Resettlement Action Plan (RAP); and
- Livelihood Restoration Plan (LRP).

Stakeholder engagements and consultations are ongoing to ensure an inclusive process where community perspectives are heard.

Biodiversity Management

Progress of the Offset Site Development



Habitat Area Impacted by the Project

Offset Areas as of October 2025

Target Offset Area

**May be changed depending on the performance of created sites.*

Airport Development

Delivery of sand to the airport platform continues.

IMPORTANT REMINDER

Construction activities are currently in progress on the airport platform. To ensure safety, unauthorized personnel are prohibited from entering the area.

November Look-Ahead

Livelihood Restoration	• Recruitment and onboarding of PAPs for employment in the Biodiversity Offset sites • Continuous production of round rags to be supplied to SMYPC San Fernando Plant
Compliance	• Participation in the 4th Quarter Adopt-A-Waterbody Meeting with DENR-EMB Region 3, LGU and BLGU of Meycauayan, Bulacan, and Mandamus agencies of the Manila Bay Program
Environmental Monitoring	• Weekly in-situ and monthly ex-situ water quality monitoring, borehole drilling activity inspection, groundwater sampling, noise and ambient air quality monitoring, and land platform inspection
