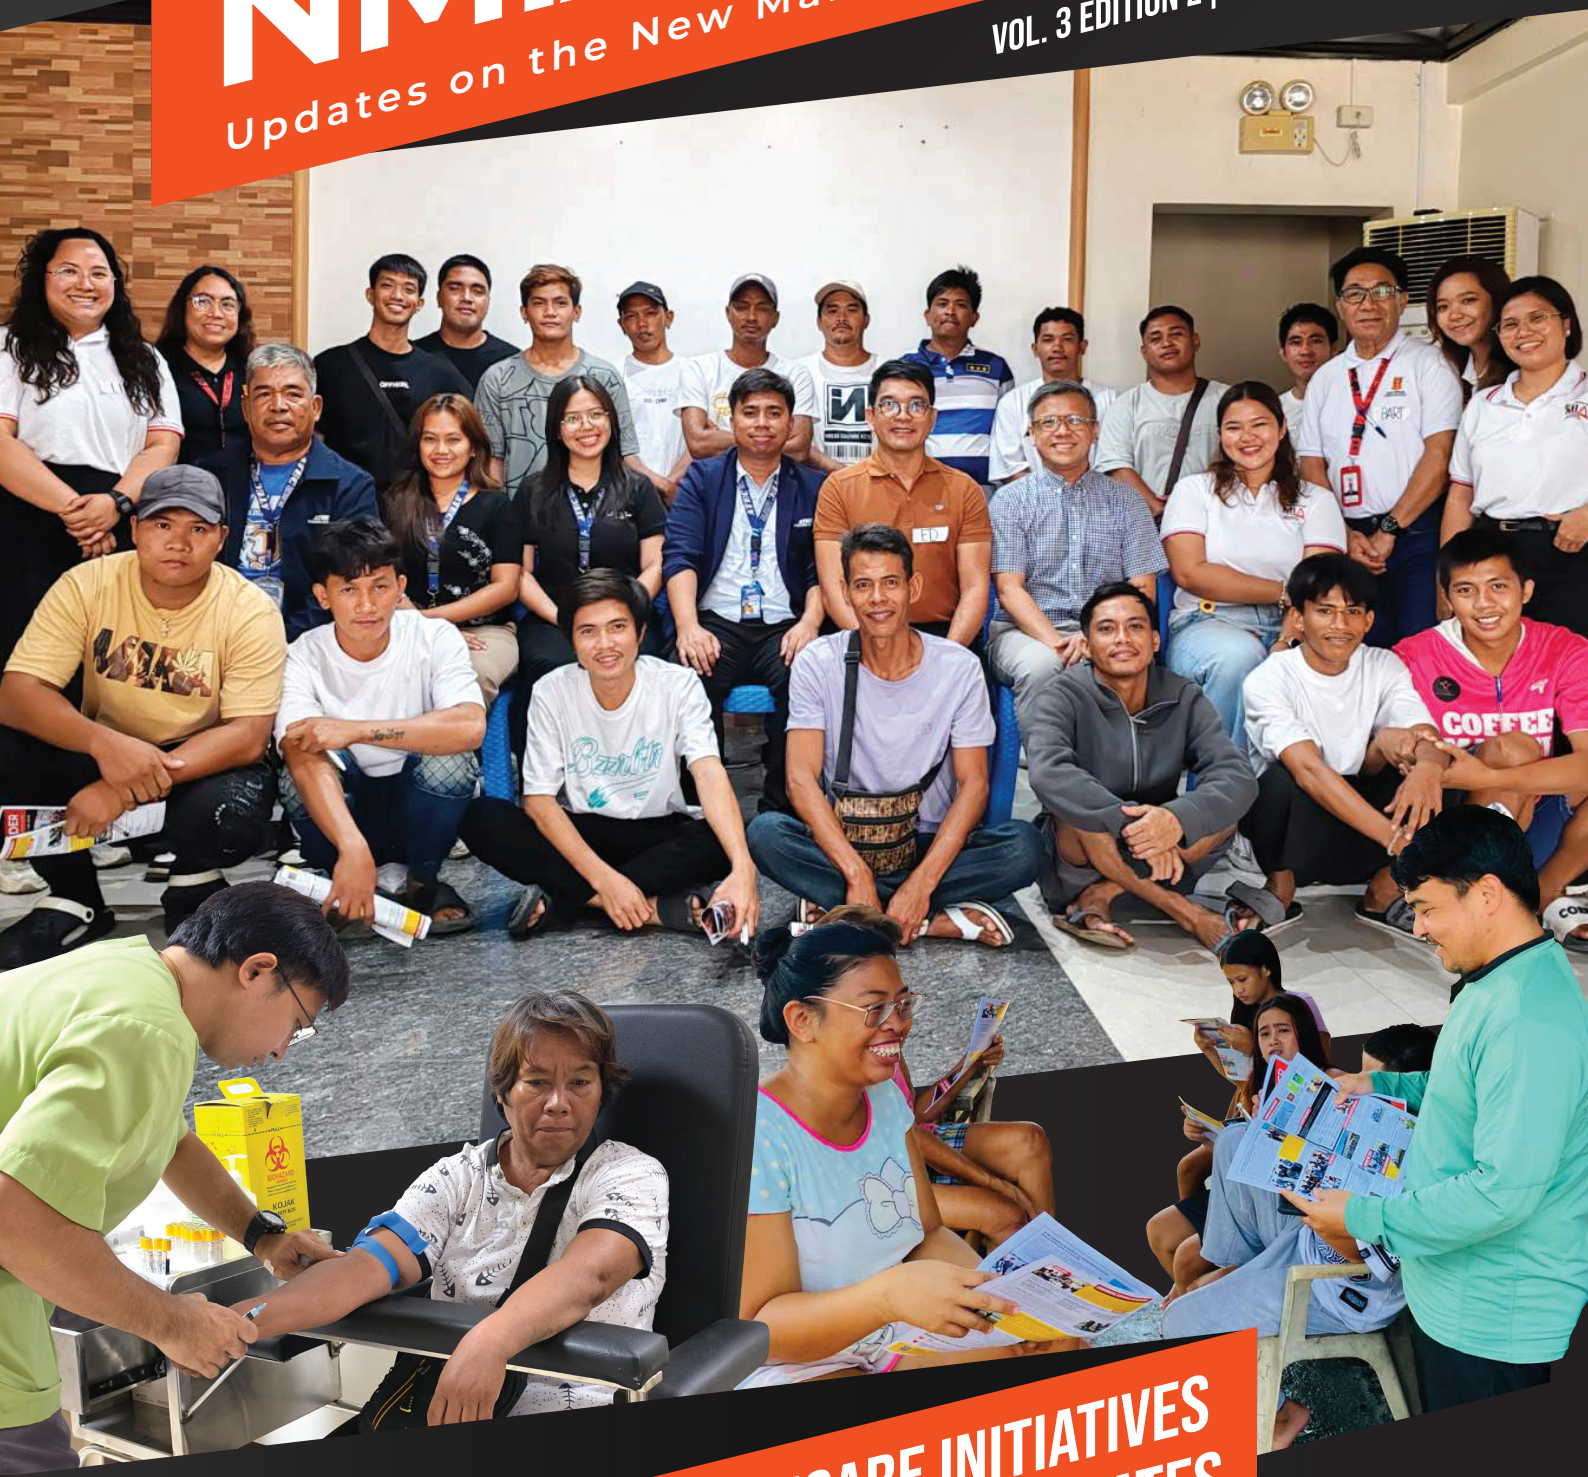
Updates on the New Manila International Airport

VOL. 3 EDITION 2 | APRIL - JUNE 2026



## COMMUNITY CHECK-IN: HEALTHCARE INITIATIVES FOR PAPS AND NMIA UPDATES

# LIVELIHOOD RESTORATION PROGRAMS

Eleven (11) Project-Affected Persons (PAPs) were hired and cleared for deployment following completion of their medical examinations. Eight (8) were assigned as offset workers in Saribuhay sa Babatnin, one (1) was hired as mangrove field assistant, while two (2) were deployed as watchmen in Hagonoy. As of June 30, 56 PAPs are currently employed as Biodiversity Community Workers.

Meanwhile, the eight (8) PAPs hired by SMAI as boatmen have completed the Marine Transfer of Personnel Training and Navigation Training. This has strengthened their safety awareness, operational readiness, and compliance with maritime safety protocols.

Sentro88 Foods hired seven (7) additional PAPs to serve as kitchen helpers, cooks, and office workers, bringing the total number of PAPs provided with employment opportunities under Kitchen-to-Platform Program to 19.

Seven (7) PAPs were hired through the first Local Recruitment Activity organized by SMAI, PESO Bulakan, and NMIA Project contractor ArchEn Technologies. The PAPs will work at the land platform as spotters, flagmen, and helpers and will be deployed to the airport platform.

Thirty-two (32) Project-Affected Persons (PAPs) enrolled and attended the first batch of orientations for the Construction Workforce Development Program. Conducted in partnership with ATEC Technological College, the sessions introduced the Reinforcing Steel Works NC II course and the employment opportunities available within the NMIA Project and the local construction industry.

## Expanding PAPs' Access to Healthcare

SMAI continues to improve access to essential healthcare for PAPs through partnerships with local health offices. In collaboration with the Obando Municipal Health Office (MHO), elderly PAPs and those living with chronic illnesses received free medical check-ups and medicines, helping them monitor their health, follow up on diagnostic results, and learn about available MHO health programs.

Meanwhile, 15 PAPs participated in the second batch of free medical check-ups at the Bulakan Rural Health Unit (RHU) on June 23 and 25. They received laboratory tests, medical consultations, free medicines, X-ray services, and PhilHealth registration assistance. SMAI also provided transportation support to ensure participants could access these services, helping reduce medical expenses and support their continued participation in Livelihood Restoration (LR) activities.

## Kumusta? COMMUNITY ENGAGEMENTS

SMAI engaged with local government stakeholders to provide updates on Airport development.

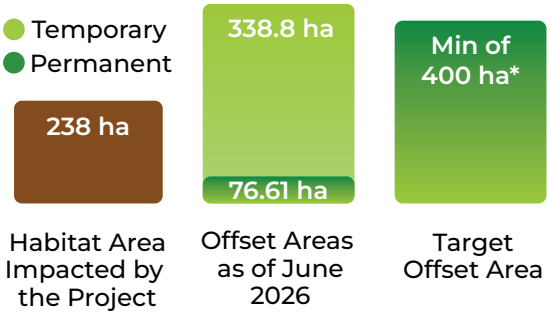
## BIODIVERSITY MANAGEMENT

**BLACK-FACED SPOONBILL** *(Platalea minor)*

### Progress of Offset Site Development



*May be changed depending on the performance of created sites.

The Black-faced Spoonbill is a rare waterbird that can be observed in the biodiversity offset sites. Once listed as Endangered, the species has made a remarkable recovery and is now classified as Vulnerable by the International Union for Conservation of Nature (IUCN).

## AIRPORT DEVELOPMENT

Delivery of sand to the airport platform continues.

Ongoing installation of new sets of demarcation buoys at the Project Exclusion Zone.

**IMPORTANT REMINDER**

As construction work continues, we remind the community to please avoid entering the airport platform area. Your safety is our top priority. Thank you for helping keep everyone safe!

# ENVIRONMENTAL COMPLIANCE AND MONITORING

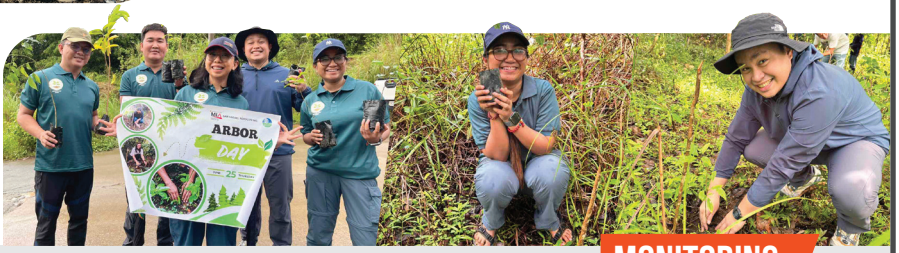
## COMPLIANCE

SMAI participated in the two-day 'Permitting on Wheels' Program of the Department of Environment and Natural Resource's (DENR's) Environmental Management Bureau (EMB) held at the Marilao Municipal Hall in Bulacan. Through this activity, awareness and understanding of the different permits, clearances, and regulations of DENR-EMB and the Mines and Geosciences Bureau (MGB) were strengthened.

SMAI attended the 1st Quarter 2026 Adopt-a-Waterbody Program for Meycauayan River on April 27.

SMAI participated in the clean-up drive activity at Brgy. Saluysoy, Meycauayan, Bulacan as part of its commitment to participate in the restoration, rehabilitation and clean-up activities of the Marilao Meycauayan Obando River System (MMORS).

SMAI also took part in the Arbor Day Tree Planting Activity in Brgy. San Agustin, Magallanes, Cavite led by DENR - Provincial Environment and Natural Resource Office (PENRO) – Cavite on June 25.



## MONITORING

As part of SMAI's environmental stewardship initiatives, the following monitoring activities are regularly conducted in the following areas:

- **Noise monitoring**
  (Meycauayan, Bulakan, Marilao, Malolos and Obando)
- **Ambient air quality monitoring**
  (Brgy. Perez, Bulakan; Brgy. Ibayo, Marilao; and Brgy. Tawiran, Obando)
- **Inspection of completed boreholes and the construction of its well housing**
  (Brgy. Taliptip, Bulakan and Brgy. Salambao, Obando)
- **Water quality monitoring**
  (Manila Bay, Brgy. Ubihan, and Brgy. Bambang)
- **Groundwater sampling**
  (Brgys. Taliptip and Bambang, Bulakan and Brgy. Salambao, Obando)

Results from the noise quality monitoring conducted in April-May indicated that no audible noise caused by the Project activities were detected across all 13 monitoring stations.

Water quality monitoring for April - June showed that non-project related factors such as surface runoff and human activities caused certain water test results to exceed the standards for water quality set by the Department of Environment and Natural Resources (DENR).
