Updates on the New Manila International Airport

VOL. 3 EDITION 3 | JULY - SEPTEMBER 2026

EMPOWERING COMMUNITIES THROUGH SKILLS AND OPPORTUNITIES

Kumusta? COMMUNITY ENGAGEMENTS

SMAI regularly meets with local stakeholders to provide updates on Airport development.

Barangay	Bulakan	Pitpitan, San Nicolas, Maysantol, Taliptip
	Malolos	Namayan, Pamarawan, Caliligawan, Babatnin, Masile
	Bocaue	Bunducan
LGU	Bulakan	
Academe	Bulacan State University Meneses Campus, Romeo Acuña Santos Memorial High School Teachers (Bulakan, Bulacan)	
Religious Institutions	Nuestra Señora de la Asuncion, Bulakan; San Isidro Labrador Parish Church in Brgy. Bambang, Bulakan; and Bahay Dalanginan ni Santa Ana in Brgy. Sta. Ana, Bulakan	
Civil Society Organizations	Vallet Organization Dedicated to Kind Action (VODKA) - Sta. Ana, Bulakan; Kababaihan Sama-sama sa Bagong Bulakan (KSSBB); and Federation of Senior Citizens Association of the Philippines, Inc. (FSCAP) - Bulakan Chapter	

AIRPORT TOLL ROAD

SMAI continues to engage local government units, barangays, and affected communities for the Resettlement Action Plan (RAP) of the Airport Toll Road (ATR)/MALEX project.

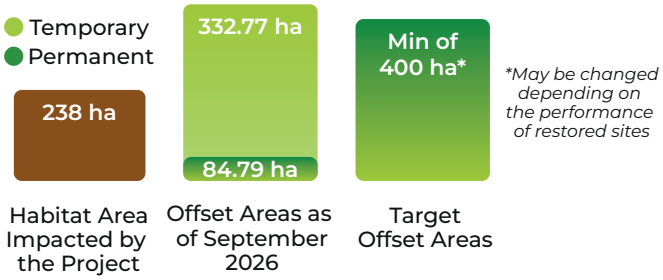
RAP activities for affected properties are also ongoing, including census and tagging, socio-economic surveys, and detailed measurement surveys. These activities are being undertaken by EcosysCorp Inc., which has been engaged for the finalization of the RAP.

Through these regular consultations and information-sharing activities, SMAI strengthens open communication throughout the resettlement process.

BIODIVERSITY MANAGEMENT

GREAT KNOT *(Calidris tenuirostris)*

Progress of Offset Site Restoration



**May be changed depending on the performance of restored sites*

The Great Knot travels thousands of kilometers from its breeding grounds in the mountainous tundra of northeastern Russia to wetlands such as North Manila Bay. Classified as Endangered by the International Union for Conservation of Nature (IUCN), it searches tidal mudflats for shellfish, worms, crabs, and shrimps before moving to nearby saltpans, sandbars, and other resting areas as the tide rises.

AIRPORT DEVELOPMENT

Delivery of sand to the airport platform continues.

IMPORTANT REMINDER
As construction work continues, we remind the community to please avoid entering the airport platform area. Your safety is our top priority. Thank you for helping keep everyone safe!

LIVELIHOOD RESTORATION PROGRAMS

SMAI introduced its Livelihood Restoration Programs during the General Assembly of the Bulakan Senior Citizens Officers in August.

Community Boat Fleet Program

The eight Project-Affected-Persons (PAPs) in this program participated in safety workshops, enhancing their skills in responding to marine incidents and emergencies.

Local Hiring

Three PAPs were hired as mangrove field assistant and biodiversity offset workers, while one PAP was hired as a flagman at the land platform this quarter. This brings the total number of workers hired through SMAI's partnership with ArchEn Technologies to 72, supporting livelihood restoration and providing more employment opportunities for PAPs.

Ready2Serve Program
Kasanayan. Kabuhayan. Kinabukasan.

SMAI launched Ready2Serve, a hospitality services training program, through a series of recruitment activities for 50 PAPs. Participants will be enrolled in Housekeeping and Food & Beverage Services courses. Upon completion, they will be referred for employment opportunities under the NMIA Project and through broader local industry networks.

BuildForward Program
Kasanayan. Kabuhayan. Kinabukasan.

SMAI's BuildForward Program Opens Doors to Skilled Work for PAPs

On August 7, SMAI launched "BuildForward," a construction workforce development program. The inaugural batch of 20 trainees completed the Reinforcing Steel Works NC II training at ATEC Technological College in Guiguinto, Bulacan. Through hands-on skills development, the PAPs were able to pass the competency assessment conducted by TESDA. The trainees who signed up for the program are driven by a shared goal: to build better opportunities for themselves and provide for their families.

> *Hindi ako papayag na makikita ako ng mga barkada ko na nasa lansangan lang. Ipapakita ko sa kanila na may potensyal ako* [I want to elevate my status and show my friends my potential]. - Prince Lawrence Matito, Trainee

The 20 trainees have since secured employment opportunities at Prime BMD, a construction company based in Manila. On August 25, they were hired as steelmen during the 2026 World Cafe of Opportunities Job Fair organized by the TESDA Provincial Office of Bulacan.

The program culminated in a graduation ceremony attended by the PAPs and their families on September 29 at the SMAI Livelihood Center. Their achievement reflects the Livelihood Restoration Program's commitment to providing skills development opportunities that can help PAPs build sustainable livelihoods and transition into employment.

ENVIRONMENTAL COMPLIANCE & MONITORING

COMPLIANCE

On August 10-11, SMAI participated in the Department of Environment and Natural Resources (DENR) Eco-Governance Summit held at Royce Hotel in Clark, Pampanga. Led by the DENR-EMB Region III, the activity aimed to strengthen environmental governance and promote responsible environmental and industrial practices.

SMAI joined the Nationwide Bamboo Planting Activity on September 17 in celebration of the Philippine Bamboo Month, held in Barangay Ramirez, Magallanes, Cavite, upon the invitation of the Provincial Environment and Natural Resources Office (PENRO), The activity carried the theme “Kawayanihan: Masaganang Kabuhayan at Mayabong na Likas-Kawayan sa Luntiang Kinabukasan,” highlighting the importance and benefits of bamboo for the environment and communities.

SMAI took part in the 2026 International Coastal Cleanup activities in Ternate, Cavite on September 19, upon the invitation of the Municipal Environment and Natural Resources Office (MENRO).

ENVIRONMENTAL MONITORING

As part of SMAI’s environmental stewardship initiatives, the following monitoring activities are regularly conducted in the following areas:

- **Noise monitoring**
  (Bulakan, Obando, Marilao, Bocaue, and Malolos)
- **Groundwater sampling**
  (Brgys. Taliptip and Bambang, Bulakan and Brgy. Salambao, Obando)
- **Borehole inspection**
  (Brgys. Bambang & Taliptip, Bulakan, and Brgy. Salambao, Obando)
- **Surface-water quality monitoring**
  (Manila Bay, Brgy. Bambang, Bulakan; and Brgy. Ubihan, Meycauayan)
- **Quarterly ambient air quality monitoring**
  (Brgy. Perez, Bulakan; Brgy. Tawiran, Obando; and Brgy. Ibayo, Marilao; Duhat Elementary School; Lolomboy High School; and Abangan Norte Elementary School)

PROJECT HANGIN

Project HANGIN is SMAI's continuous ambient air quality monitoring system. Through sensors installed within and around NMIA, it provides 24/7 tracking of the air quality, noise and weather conditions.

Via an online platform with automated remote access and real-time notification of early warnings for conditions requiring quick response, SMAI can promptly assess potential environmental concerns and in coordination with its Contractors take appropriate action to help minimize impacts on nearby communities and the environment.
