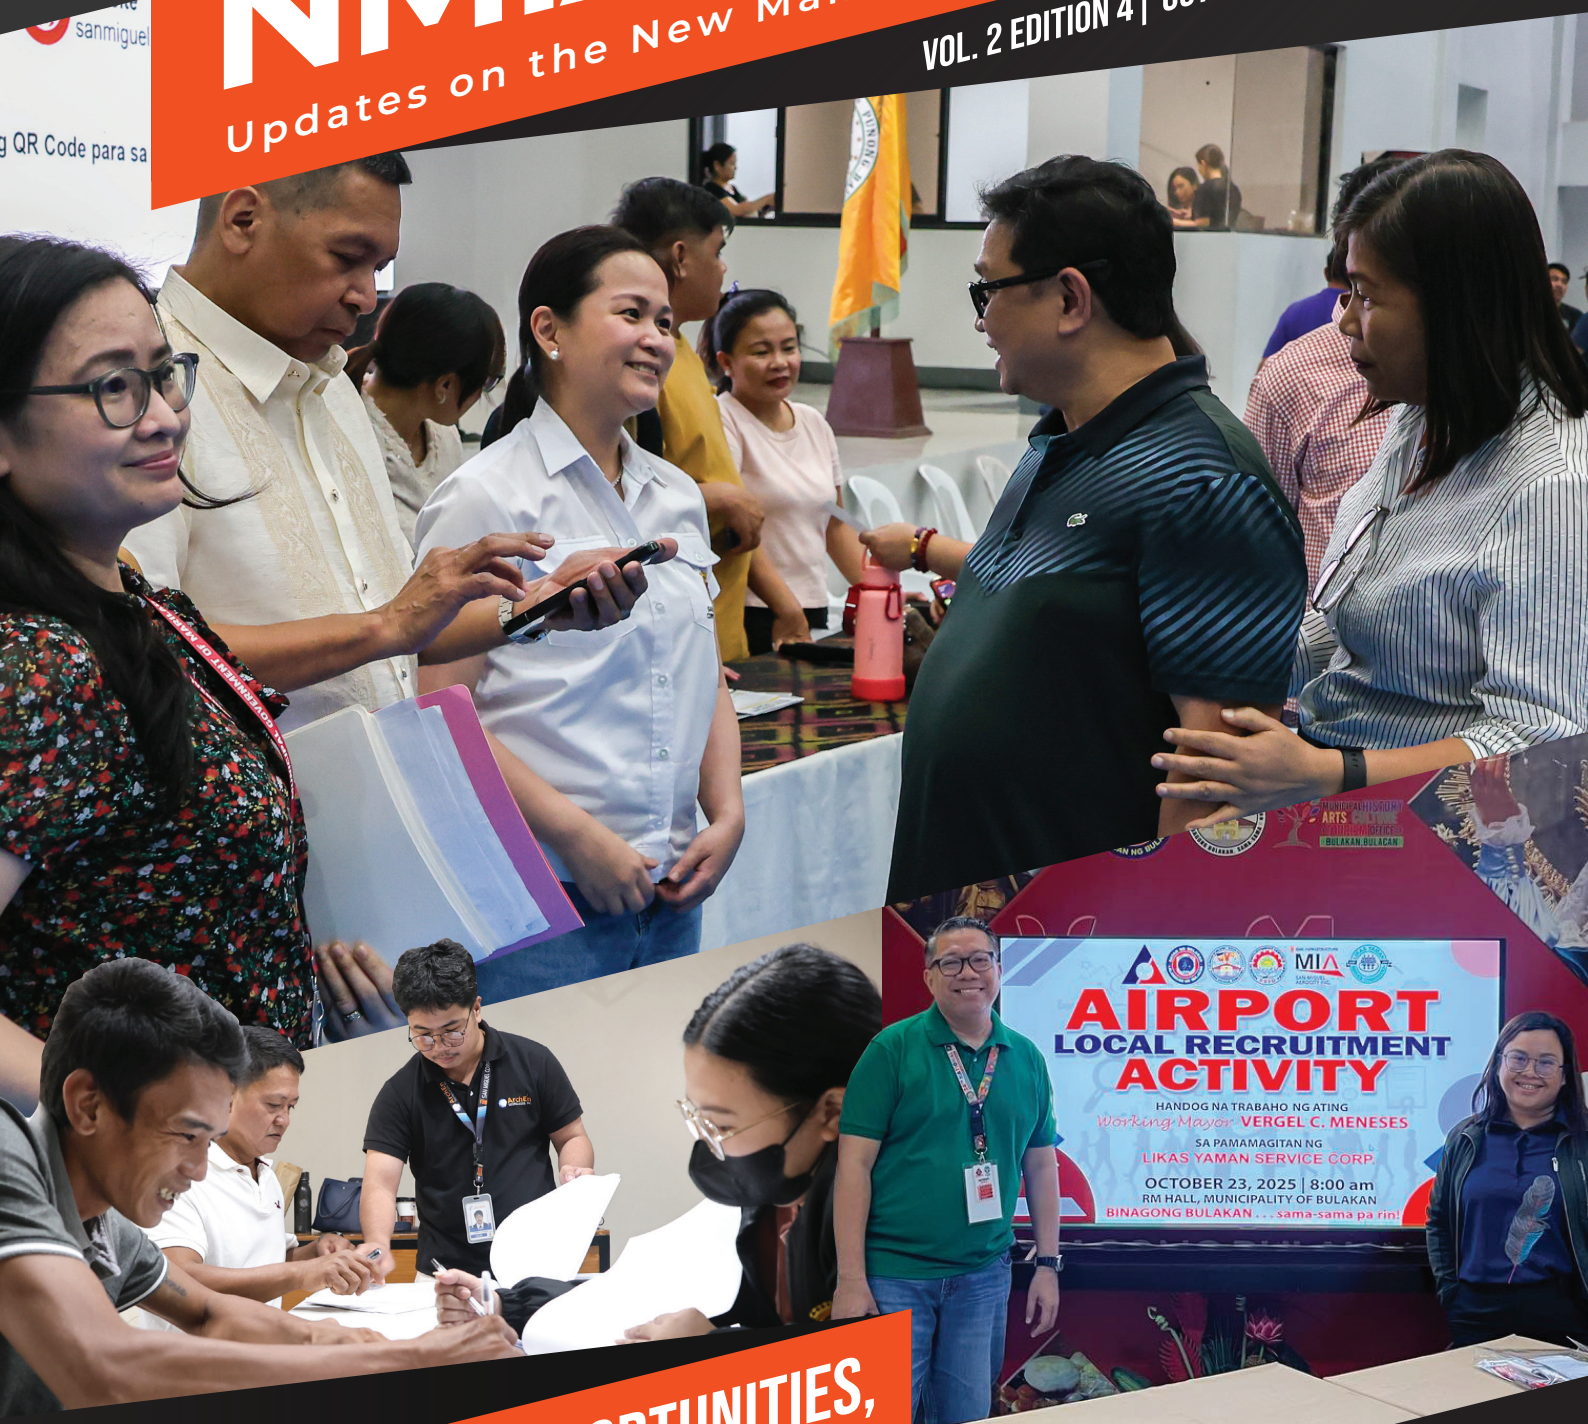
Updates on the New Manila International Airport

VOL. 2 EDITION 4 | OCTOBER - DECEMBER 2025



## BUILDING OPPORTUNITIES, STRENGTHENING PARTNERSHIP WITH COMMUNITIES

# LIVELIHOOD RESTORATION PROGRAMS

Eight (8) Project-Affected Persons (PAPs) were hired for the **Community Fleet Service – Boat Program** to provide transportation services to support the NMIA project sites. They received safety tools and canopies for their boats to enhance protection and operational safety.

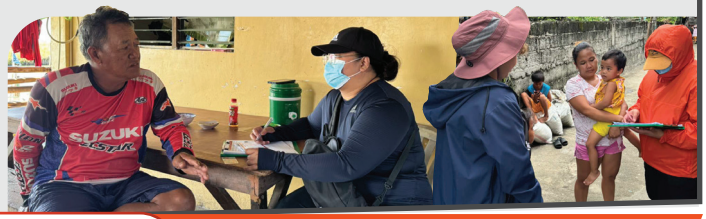
**Thirteen (13) PAPs were hired as kitchen helpers and food servers** in partnership with Sentro88 Foods. Five (5) of them attended a Job Readiness and Pre-employment Learning Session to prepare them for their new jobs.

**4,370 kg of colored rags sewn by eight (8) PAPs** were delivered to the plants of San Miguel Yamamura Packaging Corporation (SMYPC) in Laguna and Pampanga.

**Thirteen (13) PAPs were hired as monitoring community workers, mangrove field assistants, and offset workers** at the biodiversity offset sites in Hagonoy and Malolos, Bulacan, and Macabebe in Pampanga.

The Annual Physical Examination (APE) was conducted for 74 Biodiversity Management Program (BMP) workers, 33 of whom are economically-affected PAPs.

In keeping with IFC Performance Standard 5, which requires that the living conditions of displaced families be restored or improved, SMAI continues to monitor the situation of PAPs. The team recently conducted house-to-house visits in Bulakan, Hagonoy, Obando, Balagtas, Pandi, and Bocaue to check current living conditions and update household records. This activity helps ensure that affected families receive the necessary support and that their living standards are continuously improved.



# Kumusta? COMMUNITY ENGAGEMENTS

SMAI engaged with residents and local officials of 20 barangays in Bulacan, and the municipal government of Marilao to discuss their concerns and distribute information bulletins containing important updates about the Airport development.

| | | |
|---|---|---|
| **Barangays** | Bulakan | San Jose, Sta. Ana, Bagumbayan, Perez, Sta. Ines, San Nicolas, Taliptip, Balubad, Bambang, Matungao, Tibig, Pitpitan, Maysantol, San Francisco |
| | Malolos | Namayan, Babatnin, Caliligawan, Pamarawan |
| | Obando | Binuangan, Salambao |
| **LGU** | Marilao | |

SMAI distributed Pamaskong Handog packages to the municipal government of Bulakan and several barangays across Bulacan.

The Community Advisory Council (CAC) convened on October 15 to discuss updates on the Airport Project. The CAC serves as a forum for dialogue and collaboration between SMAI and the municipality of Bulakan, ensuring that community perspectives, concerns, and recommendations are duly considered.

SMAI conducted a **capacity-building session with the CAC** on November 21, focusing on assessing and strengthening existing and proposed livelihood programs. The activity aimed to identify areas for improvement and explore opportunities for strategic collaboration between the council and SMAI to enhance the effectiveness and long-term sustainability of local livelihood initiatives.

## AIRPORT TOLL ROAD

As part of the Project, an Airport Toll Road (ATR) will be built to connect NMIA to the North Luzon Expressway (NLEX), providing seamless travel to and from the airport. The ATR component is part of Republic Act 11506, which grants SMAI the franchise for NMIA through a public-private partnership with the national government.

To prepare for implementation and ensure impacts are identified and mitigated, SMAI is developing the following:

- Environmental and Social Impact Assessment (ESIA),
- Project-Induced In-Migration Study (PIIM),
- Traffic Impact Assessment (TIA),
- Resettlement Action Plan (RAP), and
- Livelihood Restoration Plan (LRP).

Facilitated by the local government unit of Marilao, a **Town Hall** meeting was held on November 18 where SMAI and Mayor Atty. Jem Sy addressed concerns regarding the ATR Project.

## LOCAL HIRING

Elite Marine Construction Corporation (EMCC) successfully completed a series of **Local Recruitment Activities** (LRA) from September to November 2025 in collaboration with SMAI and Public Employment Service Office (PESO) of Bulakan. This initiative created employment opportunities for skilled local applicants, particularly for roles such as straight truck drivers and articulated dump truck (ADT) operators. Out of 45 applicants who were screened, 22 were hired in the airport project and the rest are completing their pre-employment requirements.

On December 12, SMAI, together with its contractors and service providers, attended the “Labor Compliance and Employment Access” seminar led by Bulakan PESO in partnership with the Department of Labor and Employment (DOLE) Malolos. The activity aimed to educate its partner contractors and service providers on PhilJobNet compliance, general labor standards and Occupational Health and Safety (OHS) regulations to further promote decent work and adherence to labor regulations in the municipality.

# ENVIRONMENT & SUSTAINABILITY DEVELOPMENT

## COMPLIANCE

- SMAI joined the **annual dispersion of 10,000 Bokashi (Mabuhay) Balls** into the Meycauayan River in Barangay Banga, Meycauayan, Bulacan. Representatives of the Department of Environment and Natural Resources - Environmental Management Bureau (DENR-EMB) Region 3, the local government unit and partner donors threw the balls into the river.
- SMAI participated as a judge during the inspection ceremony and served as a partner in the awarding activities for the **Gawad Taga-Ilog Program**, led by DENR-EMB Region 3. This engagement highlights the company's continuing partnership with DENR and its commitment to promoting community-driven waterway rehabilitation initiatives.
- The DENR-EMB Region 3 awarded SMAI a Certificate of Recognition for its role as an active donor-partner during the quarterly meeting for the **Adopt-a-Waterbody Program**.

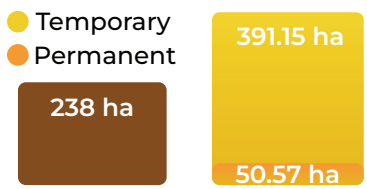
## SUSTAINABILITY

As part of SMAI's commitment to environmental stewardship, the following monitoring activities are regularly conducted:

- Water quality monitoring (Manila Bay and Brgy. Ubihan)
- Groundwater sampling (Brgys. Taliptip and Bambang in Bulakan; and Brgy. Salambao in Obando)
- Monthly noise and quarterly air quality monitoring (Bulakan, Marilao, Meycauayan, Obando, and Malolos)
- Borehole drilling activity inspections (Brgys. Binuangan and Salambao, Obando)

## BIODIVERSITY MANAGEMENT

**Progress of Offset Site Development**



Habitat Area Impacted by the Project

Offset Areas as of December 2025

Target Offset Area

*May be changed depending on the performance of created sites.

## AIRPORT DEVELOPMENT

Delivery of sand to the airport platform continues.

**IMPORTANT REMINDER**

As construction work continues, we remind the community to please avoid entering the airport platform area. Your safety is our top priority. Thank you for helping keep everyone safe!
